# STHAPATYA

Institute for Construction Training & Skill Development

Construction Industry is growing fast with advance technologies in all sectors like Residential, Commercial, Industrial and Infra Structural growth.

The Construction Industry having second highest GDP of India with huge potential for employment.

Civil Engineering is core branch of engineering where once credibility & credentials matter with field experience and skill sets.

All Civil Engineering students or fresher need practical and job oriented training to penetrate into job market with certain training and skills which the employer expect from the candidate.

Also the **General or Non Technical Candidates**, can make their career sustainable by acquiring the basic construction skills through training, site exposure and internship programs.

Though the industry has vast potential for employability, candidates struggle for job as they are not meeting the requirement of employers.

To Cope up with this need, we **STHAPATYA Institute for construction training** introduces **Government Approved Certificate Training Courses**, as well as some technical skill upgradation courses for technical students and fresher.

In the ever-evolving world of construction, the demand for skilled professionals is on the rise. The construction industry, a corner stone of global development, is constantly seeking individuals equipped with the right knowledge and technical skills. This is where **STHAPATYA plays a crucial role.**

**STHAPATYA** : It's a bridge that connect students to the industry by providing them with hands on experience and industry-specific knowledge.
